# WebAPI Documentation

This API allows users to obtain flight reviews from passengers.

API Structure

The API follows the REST conventions and use Swagger OpenAPI to help resolve errors you may receive.

Defaults

Errors

Flight Review API uses common HTTP response codes to inform users of the success or failures of an API request.

Error Code	Description
200	Successful, "OK"
201	Successful, "Created"
204	Successful, "No Content"
400	Client Error, "Bad Request"
404	Client Error, "Not Found"
500	Sever Error, "Not Implemented"
